Tank Wagon and Station Market

The tank wagon market in the various parts of the United States, is printed in the current issue of Oil News, and with a few exceptions is doubling correct. For instance, there should be a cent added for Nebraska and one cent for Ohio and Oklahoma. It is of great interest, as it is the first set printed showing rates in the greater part of the country, since the first advances in freight rates.

Table with columns for Tank Wagon Gasoline, Station Gasoline, and Tank Wagon Kerosene. Rows list various states and territories such as New England Territory, Pennsylvania Territory, New Jersey Territory, Louisiana Territory, etc.

The No. 1 at the center of the east line of the west half of the north-west of the north portion, made 220 barrels the third day. The same people are shifting oil water in the test to the southeast corner of the northeast of 2-14-8, where they have a fine well in the Pora sand, the top of which was found at 2,229 feet. The sand is hard and it was thought at first there was no oil after the shut, but the next morning the well was flowing over the beam. The Pora sand down that way is about 25 feet in some of the tests that have been drilled through, but neither the Pulaski well or the Wines well in 25-1-5 have been drilled entirely through the sand.

Inola Extensions G. W. Webster has a 155-barrel producer in his No. 5 well, located in the southwest of 24-19-15, Wagon county, Okla.

Gladys Belle Well Showing Good The Gladys Belle well, east of Laxton, in 22-26-59, swabbed 125 barrels Monday, which is certainly a good production for the day.

Kingwood "Gusher" Drilled Deeper The Kingwood Oil company's big well in the southeast corner of the northeast of 16-1-11, near Henretta, was deepened four feet, to 2,021 feet Monday, increasing its daily flow from 1,420 barrels to 2,700 barrels.

Northwest of Keystones The Floyd O. Howarth Oil & Gas Co. is drilling at 309 feet in a 12-inch hole, in its test northwest of Keystones, in 19-20-5, Pawnee county, Oklahoma.

J. P. Thayer is Dead J. P. Thayer, aged 36, died Sunday at Westphalia, Kan., where he was superintending the drilling operations for John Markham.

Sinclair Well Better Than Reported The Sinclair well in the northeast of 12-22-4w is making 2,000 barrels, which is at least 500 barrels better than it was making a few days ago, according to reports received at that time.

Good Wells in Eastland County, Texas Riley and others have a 700-barrel well in sand found from 2,263 to 2,291 feet in their No. 2 Johnson in Eastland county, Texas.

Make Reservations Now The Independent Oil Men's association meeting at Denver, is still attracting much attention and many are going as the reservations which have already been made plainly indicate.

The Pulaski Oil Company In The Limelight Not only has the Pulaski Oil company been exceptionally fortunate of late in the wells drilled with Fred Casperson in 21-18-11, but it is completing two more in 16-15-18, one of which is located in the southeast corner of the northeast of the northeast of the northeast and has the earmarks of a fine producer from the Dutchman sand.
